OBJECTIVE

Computer Science Engineering graduate with a strong foundation in programming, data structures, algorithms, and software development principles. Proficient in Java, Spring Boot, Java Script, HTML, CSS, React.js, and SQL, with hands-on experience in designing and developing web applications.

SKILLS

Programming Languages	Java, Python, JavaScript
Web Technologies	HTML ,CSS
Frameworks/Libraries	Spring Boot and React js
Databases	MySQL
Tools	Github, postman and MySQL Workbench
Certifications	M.S. Office Applications – Yuva Shakthi Education Society-2022 , Full Stack Java Internship – skillDzire (May–June 2025), Linguaskill English Test – Cambridge Assessment English (B1 CEFR Level)

EXPERIENCE

Tap Academy - Java Developer Intern

- Completed a 6-month Java Full Stack Development training program at Tap Academy, gaining hands-on experience in Core Java, OOP, Collections, Spring Boot, HTML, CSS, React, and SQL.
- Developed a School Management System with Spring Boot for backend development and REST API communication, React.js for frontend development, and SQL for database management.

PROJECTS

- **School Management System:** Developed a School Management System using a Microservices Architecture to reflect industry practices, integrating Eureka Server for service registration and discovery, an API Gateway for centralized routing, REST APIs for inter-service communication, and Role-Based Access Control (RBAC) for five user roles: Admin, Teacher, Student, Staff, and Parent.
- **Student Feedback and Course Evaluation System:** Developing an Online Course Management System with Spring Boot REST APIs, MySQL database, and a React JS frontend, featuring Role-Based Access Control for Admin and Student functionalities.
- **PG-hunt:** Developed PG-Hunt using a microservices architecture with Spring Boot, React.js, API Gateway, Eureka Server, and REST APIs, following industry-standard development practices.

ACHIEVEMENTS

PG-Hunt

- Developed PG-Hunt, an innovative platform where local PG Hunters personally accompany PG seekers to physically visit and compare suitable PGs, while connecting PG owners with potential tenants through a platform-fee model.
- Designed and implemented core microservices using Spring Boot, React.js, API Gateway, Eureka Server, and REST APIs, following industry-standard development practices.

EDUCATION

B.Tech (Computer Science and Engineering), G. Pullaiah College of Engineering and Technology

CGPA: 7.8 / 10

2022–2026

Kurnool, Andhra Pradesh, India
